Our first list of the new year includes a rather decent selection of crowns and minors from nearly every nation in Latin America. Collectors focusing on Guatemala or Peru will be pleasantly surprised by the material offered from those popular series. You might notice that we have made our usual effort to avoid inflating prices of our AU-UNC coins (an uncommon practice these days).

Our annual auction catalogue is now in the late stages of preparation. If you have not received your copy by March 1, please call or write so that another can be sent.

Due to the great interest shown by investors in buying small quantities of one coin, we will make a few "bulk lot" offerings. The prices of each lot in this unprecedented offering are net to all collectors and/or dealers. We have only one group of each unless otherwise noted, so our usual first-come, first served policy will be in effect.

(Note: every Bolivian Republic coin in this selection is in above average condition.)

BRAZIL The recent surge in popularity, and salability, of any decent quality Brazilian colonial, empire or republic coin is noteworthy. Some credit for this must go to people like Ben Garman (Globe Co.) who are making an active market in these coins. While average condition, common dates and types remain unpopular, there seems to be an eager new group of collectors who are actively seeking out the better pieces. With modern (post 1889) republic issues, the desired coins must be AU-UNC or better. Simultaneously, nice Very Fine or better colonial pieces sell well while VG-F examples go begging. Unfortunately, our stock of decent pieces is at a six-year low with no new groups currently being offered to us. Please let us know if you can remedy this situation (although I cannot recommend that you sell at this time as these coins are now underpriced relative to almost all other series).
